Education

Grand Canyon University — Bachelor of Applied Technology, Information Systems (Expected 2026)

Technical Skills

Languages & Tools: SQL, PHP, Python (basic), HTML/CSS, JavaScript (basic), Git/GitHub

Databases: SQL Server, MySQL, MongoDB

Concepts: Data Warehousing (Star Schema), ERD/DFD modeling, Cybersecurity fundamentals

Other: Microsoft Project, MS Excel, Troubleshooting, Networking basics

Projects

WaiterWebsite (PHP/MySQL Web App): Designed a restaurant tip-tracking and shift-management system with real-time waiter calculations and secure login. Deployed via Hostinger (mdakhan.online).

SQL Server Data Warehouse: Built a star-schema with FactSales and dimension tables (Customer, Product, Store, Date) using AdventureWorksDW. Implemented queries for sales trend analysis.

MongoDB Hotel Database: Designed a NoSQL solution to store hotel data (rooms, amenities, rates), demonstrating flexibility in schema-less storage.

Cybersecurity Labs: Configured email encryption (Thunderbird + digital certs), performed OSINT investigations, created public awareness PSA on phishing threats.

Experience

Phlebotomist / Lab Assistant – Labcorp, Orland Park, IL (2024) - Certified phlebotomist performing patient blood draws with precision and compliance to healthcare safety standards. - Worked in a laboratory environment, gaining firsthand understanding of patient care workflows and medical data handling. - Collaborated with healthcare staff to ensure accurate specimen collection, processing, and reporting.

Server/Waiter – Mdakhan Restaurant, Bridgeview, IL - Delivered high-quality customer service in a fast-paced environment, managing transactions and resolving customer concerns. - Strengthened teamwork and communication skills, transferable to IT support and cross-functional collaboration.

Certifications

WEB 101

CompTIA A+ (in progress, expected Dec 2025)
